THE REFRAME

Where finance, data and transformation become one intelligence system.

I help global organisations connect finance, enterprise data and transformation into trusted decision systems — connecting executive strategy with enterprise data to drive faster, smarter business decisions.

MOST LEADERS SPECIALISE – I CONNECT THE DISCIPLINES

Finance

Executive decision support through FP&A, commercial finance, business partnering and operational performance.

Data

Enterprise data engineering, AI, predictive & prescriptive analytics, and trusted business intelligence.

Transformation

Global ERP, BI and AI delivery with governance, adoption and measurable business outcomes.

THE RESULT

**One version of truth.
Better execution.**

**Faster decisions.
Measurable value.**

SIGNATURE INITIATIVES

INITIATIVE	WHY IT MATTERS
Enterprise Data Harmonisation	Unified 20+ ERP systems into one trusted reporting platform.
Supply Chain Visibility	Enabled business continuity and customer delivery during COVID disruptions.
Executive Decision Intelligence	Delivered executive dashboards, KPIs and decision support across 70 countries.
AI & Advanced Analytics	Combining Python, AI, predictive and prescriptive analytics to improve business decisions.

CASE – CRISIS SUPPLY CHAIN VISIBILITY

CHALLENGE

Global COVID disruption threatened customer deliveries.

SOLUTION

Built enterprise visibility across manufacturing, inventory and orders to enable proactive decision-making.

IMPACT

Helped leadership prioritise production, manage shortages and maintain customer commitments during one of the most challenging periods in modern supply chains.

THE C-SUITE ASKS IN FIVE LANGUAGES. I ANSWER IN ONE.

One source of truth — and what to do next.

CEO **Where are we going, and how fast?**

I give the top of the house one reconciled view of growth, momentum and risk — so direction is set on the same numbers everyone else is working from.

CF0 **Where is value leaking?**

I trace value leakage through pricing, transfer pricing and working capital, turning month-end reconciliation into forward decisions.

C00 **Where are we losing efficiency?**

I surface where cost, cycle time and inventory quietly erode performance — and make it visible before it compounds.

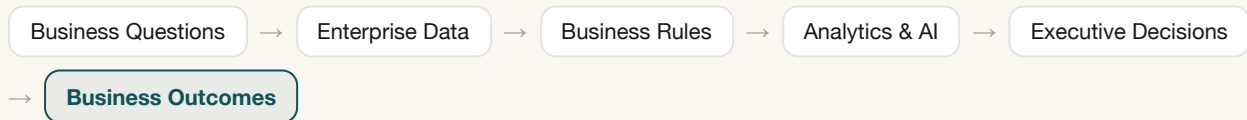

CIO **Will it scale and hold together?**

I build the data foundation — governance, master data, semantic models — that an enterprise can actually run on, not just demo.

CDO **Can we trust the numbers?**

I make one definition the whole business agrees on, so ‘the number’ is the same in every room.

I BUILD DECISION SYSTEMS, NOT DASHBOARDS

Let's build the network.
